Development

Sorghum in the 21st Century Global Sorghum Conference

June 5-9, 2023

Following the immensely successful 2018 Sorghum in the 21st Century Global Sorghum Conference in Cape Town, South Africa, the international sorghum community is preparing to gather again in 2023 to share and learn about the latest developments in research, innovation and industry.

Organized by CIRAD in consortium with its global partners, the conference will encompass the entirety of the sorghum value chain - from genetics to agronomics to end uses - and will highlight many of the key challenges currently being faced by sorghum around the world. Topics and sessions will be targeted to both researchers and the private sector, with many opportunities for cross-sectoral networking.

Save the date and be watching for more details - we hope to see you there!
